MEET LONE WOLF

Transact

The groundbreaking solution for better real estate transactions is here. Lone Wolf Transact simplifies the transaction process for your entire brokerage, to ensure efficiency with the transaction workflow and client management.

Lone Wolf

What is Lone Wolf Transact?

Focused on your clients

Transactions are directly tied to clients instead of individual properties, which creates a more personalized experience between you and your clients.

Connected simplicity

Transact connects clients, properties, paperwork, and compliance in one clean, single workflow.

Better broker oversight

Custom checklists standardize paperwork and processes on every deal and ensure compliance with a broker file review process that flags potential issues and alerts agents in real time.

With Transact, you unlock:

Standardized workflows: Set up transaction workflows easily and quickly while reducing errors, saving time, and keeping everyone in your brokerage on the same page.

Faster workflows: Establish straightforward processes that agents can stick to – and use for future deals. Transact mirrors the way agents naturally set up and manage deals in the real world.

Improved agent productivity and accountability: Set due dates for transaction actions and track your agents' progress and compliance in real time.

Easier signings: Send deals off for signing in one click with real estate's top eSignature solution built into the system.

Replicate client details across deals: Easily copy your clients' details into other deals when offers fall through, or if you want to spin up multiple offers quickly to help them find their dream home faster.

All in one place.

It's real estate's new deal.
